G. Fred Lee Comments

I tried, but failed to be able to print Fred's document WOODAR~2.WPD that I made you a copy of this morning. On my machine the file opens OK, but when one tries to print, it causes an out of memory error and crashes the program. Probably the End-of-File marker in the file is missing, or something like that. I have e-mailed back to him to request another copy, and suggested that it be sent here, as my private data line is much inferior

to the excellent transmission capability we have here at work (get it?)

I'll transmit you a copy of this document when I receive it.

Would you please ^①go through Fred's comments and ^②provide me with a summary of his major points, and your recommendations ^③on how they should be handled, and I would like you to also consider ^④how best to involve Dr. Lee in the broader sense. I intend to read his material as soon as I can, but it will

be a while yet. We need to meet with him (yes, I said "WE"), and we need to

^⑤arrive at a strategy for how best to approach his issues. I believe it is critically important to get across the understanding that CALFED cannot possibly be in the position of receiving recommendations for action from a stakeholder who would also wish to be a service provider. Please provide me with a couple of dates in the near future when you would be available to join me in this. Thanks. -R-
